ZAKRIYA WAHID

Software Engineering Student • Web Developer

PROFILE

Motivated 2nd-year Software Engineering student focused on modern web development and backend engineering. Building practical applications with Python, FastAPI and Flask, with hands-on interest in REST APIs, databases, Git/GitHub and responsive web development.

TECHNICAL SKILLS

Backend	Python, FastAPI, Flask, REST APIs
Frontend	HTML, CSS, JavaScript, Responsive Design
Database	MySQL, PostgreSQL, SQLAlchemy
Dev Tools	Git, GitHub, VS Code, Docker, Postman

PROJECT EXPERIENCE

Web Development Projects

- Built web applications using Python backend frameworks and REST API endpoints.
- Connected applications with MySQL/PostgreSQL databases using structured data models.
- Implemented authentication, CRUD operations, dashboards and API functionality.
- Used Git and GitHub for source control and project versioning.

Personal Portfolio Website

- Created a responsive portfolio using HTML, CSS and JavaScript.
- Presented technical skills and projects in a professional developer-focused layout.

EDUCATION

BS Software Engineering

2nd Year Student • [University Name], Pakistan

Currently pursuing undergraduate studies.

CAREER OBJECTIVE

To gain professional experience through internships and real-world software projects, while continuously improving backend, API, database and software engineering skills.
